DETAILED ACTION

Response to Amendment

1. The amendment(s), filed on 01/04/2006, have been entered and made of record. Claims 11-17, 19-25, and 27-32 are pending.
2. The drawings were received on 01/04/2006. These drawings are acceptable.

Allowable Subject Matter

3. **Claims 11-17, 19-25, and 27-32** are allowed.
4. The following is an examiner's statement of reasons for allowance:

Claim 14 is allowed because the prior art does not teach or fairly suggest a method for processing images in a digital camera wherein the digital camera includes an image storage device having primary and secondary storage areas, comprising the steps of: generating from the raw image, including employing a second quantizing step independent of the first quantizing step, *a second compressed image data set which supplies at least a least significant bit missing in the first compressed image data set for combination with the first compressed image data set* to reproduce substantially the entire image at a second, higher quality level, the second compressed image data set being stored in the secondary storage area.

Claims 11-13 and 15-17 are allowed because they are dependent on claim 14.

Claim 22 is allowed because the prior art does not teach or fairly suggest a system of processing images in a digital camera wherein the digital camera includes primary and secondary storage areas, comprising: means for generating from the raw image, including employing a second quantizing step independent of the first quantizing step, *a second compressed image data*

set which supplies at least a least significant bit missing in the first compressed image data set for combination with the first compressed image data set to reproduce substantially the entire image at a second, higher quality level, the second compressed image data set being stored in the secondary storage area.

Claims 19-21 and 23-25 are allowed because they are dependent on claim 22.

Claim 29 is allowed because the prior art does not teach or fairly suggest a system for processing images in a digital camera comprising: a processing unit configured to generate a second compressed image data set, including employing a second quantizing set independent of the first quantizing step, wherein *the second data set supplies at least a least significant bit missing in the first data set for combination with the first data set* is to reproduce substantially the entire image at a second higher quality level, the second compressed image data set being stored in the secondary storage area if space is available.

Claims 27-28 and 30-32 are allowed because they are dependent on claim 29.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
